Learn Before You Burn

Open Burning

is the burning of any material in an open fire or an outdoor container.

Smoke from open burning pollutes the air and causes health problems for children and adults. These problems can be worse for people with lung problems.

Help keep South Carolina's air clean! Follow open burning rules and find better ways to get rid of garbage.

South Carolina and local governments have laws that limit open burning. For more information about open burning rules, call your local DHEC-Environmental Quality Control District Office.

Please see address and phone number list on back.

In South Carolina, it is against the law to burn:

- Household garbage and trash
- Paper
- Motor and waste heating oils
- Roofing materials such as shingles and tar
- Tires and other rubber products
- Building materials
- Plastics
- Paints
- Household cleaners
- Farm chemicals
- Electrical wire
- Insulation and duct work

Reduce, Reuse, Recycle

Here are some clean, easy ways to get rid of garbage:

- Mulch, chip, shred, or compost yard waste
- Recycle newspapers, drink cans, plastics, and glass
- Recycle used oil at your local recycling center
